

XBeton — Plant Shot List

Field checklist. Tick as you go. Saves into Reference Assets/Plant Photos/ · pairs with the AI Prompt Kit.

SETUP (2 MIN)

Resolution max, HDR off. Tap & hold to lock focus/exposure on the product. Same clean backdrop + soft indirect light for every product shot (open shade — no harsh sun, no colored factory light). Wipe dust off faces. Put a scale cue (hand / tape / worker / pallet) in one frame each. Grab 5–10s of slow video at every setup.

TRACK A — PRODUCT REFERENCE FRAMES (clean neutral background)

BLOCKS (8"×24" face)

Solid block

- ☐ Face-on, straight (8×24 long-low proportion)
- ☐ 45° hero (thickness + crisp edges)
- ☐ Edge-on close (tongue-and-groove profile)

Cored block

- ☐ Top-down (single round core hole)
- ☐ 45° (core + thickness)

U-block

- ☐ 45° (U-channel down the top)
- ☐ End-on, into the channel

Texture

- ☐ Extreme macro of a clean face (fine air-pocket speckle)

PANELS (24" wide, T&G edges)

Wall (8"-12" thick)

- ☐ Full length, slight angle (long span)
- ☐ Edge-on close (thickness + T&G)

Floor / Roof (8"-12")

- ☐ Full length, slight angle
- ☐ End (thickness + reinforcement detail)

Cladding / Fence (2"-4")

- ☐ Face-on (facade look)
- ☐ Edge-on (shows how thin)

BOND & SHIELD (7 SKUs)

- ☐ XBASE / XRENDER / XSEAL / XFINISH bags, front
- ☐ Group shot on a pallet (the system)
- ☐ One bag at 45° (it's a pouch)
- ☐ Anchor bolt / screw anchor / mesh tape

TRACK B — MARKETING & B-ROLL (real plant context, people + safety gear)

Scale & lightweight proof

- ☐ Worker carrying a block ONE-HANDED (money shot)
- ☐ One worker lifting a panel
- ☐ Block beside a standard cinder block (contrast)
- ☐ Full pallet with a person for scale

Manufacturing / process

- ☐ Wide plant-floor / production line
- ☐ AAC being cut to size (motion b-roll)
- ☐ Autoclave / curing area
- ☐ Nano-graphene admixture being mixed/applied
- ☐ Finished product palletized + wrapped

Installation

- ☐ Laying a block wall w/ thin-bed mortar (trowel)
- ☐ Doorway/window opening for scale
- ☐ Crane setting a wall panel
- ☐ Cutting a block with standard tools
- ☐ Finished rendered wall (XRENDER + XFINISH)

Hero / brand

- ☐ Clean finished wall in good light (cover quality)
- ☐ Tight texture detail on an installed wall
- ☐ Team / plant pride shot

IF TIME IS SHORT — SHOOT THESE 5 FIRST

- ☐ Solid block: face-on + 45° + texture macro
- ☐ Cored block: top-down (the single core)
- ☐ Worker carrying a block one-handed
- ☐ Bond & Shield group shot on a pallet
- ☐ One finished wall in good light
